Bandung, Jawa Barat 40154

SUMMARY

Undergraduate student of Informatics Engineering at Nusantara Islamic University with strong skills in Python, SQL, and Tableau. Proven ability to clean, explore, and interpret datasets to support data-driven decision-making, with a strong interest in contributing as a Data Analyst.

EDUCATION

Nusantara Islamic University

Informatics Engineering / GPA: 3.67

Bandung, Indonesia

2023 - 2027

PROJECT EXPERIENCE

Dota 2 Team Performance Analysis, Data Analysis | [Github](#) | [Tableau](#)

- Retrieved and processed professional match data from the OpenDota API across 7 tournaments using Python (Pandas, Requests)
- Analyzed team activity, win rates, aggression levels, and hero effectiveness to identify performance patterns
- Built a custom mental score metric (comeback rate – throw rate) to quantify team resilience under pressure
- Visualized findings using Matplotlib, Seaborn, and Plotly to surface insights on gameplay trends across tournaments

SKILLS

Tools: Python (Pandas, NumPy, Matplotlib, Seaborn, Plotly), SQL, Tableau, Power BI

Hard Skill: Data Analysis, Data Visualization, Statistical Analysis

Soft Skill: Problem Solving, Adaptability, Teamwork, Critical Thinking

Language: Indonesian (Native), English (Intermediate)

CERTIFICATES

- Talenta AI Indonesia** | January 2024
Microsoft Azure Data Fundamentals (by Microsoft, Kartu Prakerja, and Mereka) ([View Certificate](#))
- DQLab** | January 2024
Python Fundamental for Data Science ([View Certificate](#))
